QUALITY PRODUCTS FOR THE TS-2068

Product Descriptions

PIXEL PRINT PLUS! (available on CASSETTE or AERCO DISK, SSDD)

The premier DESKTOP PUBLISHER for the TS-2068! A 100% WYSIWYG (What You See Is What You GET) program, Pixel Print PLUS! in true DESKTOP PUBLISHING fashion provides an easy way to add pictures to your text... or text to you pictures! Rave reviews have been given in Time Design Magazine and the Computer Shopper Magazine! The MENU DRIVEN (which means easy to use, no strange commands to memorize) command list includes: Bold Font, Modern Font, Italics Font, Restore Font, Timex Font, LOAD Font, Font Height, Font Width, Line Spacing, Character Spacing, KEEP, UNDO, SAVE, LOAD, LOAD ICON, LOAD Picture, SAVE Picture, Scroll Forward (or Backward) at 3 speeds, Shift Screen Segment L-R-U-D (Left, Right, Up, or Down), Shift Cursor Position L-R-U-D, INVERSE Video, Caps Lock, OVER On/Off, Copy Segment, Erase Segment, Insert Row, Delete Row, Print TS-2040 type or full size dot matrix printer (IBM/Epson compatibles... TASMAN B/C, AERCO, A&J CPI). Procedure: Load in Graphics (pictures) from Pixel Sketch and Graphics Editor, or ARTWORX, or Tech Draw Jr., or any graphics program that uses the TS-2068 SCREEN$ function. Select your letter style (font) and type in your text. LOAD any ICONS you might want to add. SAVE your file for future use, and PRINT it. It's that EASY! Pixel Print PLUS! can use any standard 8 point type fonts, and internally creates BOLD, MODERN, or ITALICS versions of the font. It can also use non-standard size fonts (3 to 16 point) currently being developed... some of which have been used in these ads.

PIXEL PRINT PROFESSIONAL! (available on AERCO DISK - SSDD, other versions like OLIGER, MICRODRIVE, or TAPE only come on CASSETTE ready to LOAD into those media. Except for AERCO, these need an extra 32K RAM cartridge in the DOCK for "BANK-SWITCHING". The OLIGER version requires some minor USER editing to remove some REMs and activate the OLIGER DISK commands.)

The "PROFESSIONAL" is an integrated system of 4 programs run from a COMMON "BOOT MENU": PIXEL PRINT PLUS! is the heart of this system, CREATE-A-DOCUMENT allows you to define by file names, the makeup of a page... whether or not you have a page header, etc., up to 20 pages per document. PRINT-A-DOCUMENT lets you PRINT the document you created... with multiple copies. You can print a document in either a newsletter (twin 32 character column) format, or a single column (64 character) format like this page. CUSTOMIZE helps you select the printer type and interface commands needed to print with your dot matrix printer.

The Pixel Print PLUS! (Professional) employs BANK-SWITCHING technology to hold a complete page in memory at any time. The main RAM holds the LEFT 32 columns, the DOCK RAM holds the RIGHT 32 columns. An "X-change" columns command in the "PLUS!" allows you to switch from left-to-right, and back as desired. This capability also allows a true 64 column DTP format. (The AERCO DISK interface comes with 64K of DOCK RAM built-in, other systems require additional RAM to use this program). The LARKEN system uses DOCK RAM in a RAM DISK mode, the "Professional" for the LARKEN system is still in development.

THESE ADs WERE CREATED (100%) WITH THE PIXEL PRINT PROFESSIONAL AND FONTs AVAILABLE THRU LEMKE SOFTWARE DEVELOPMENT.

QUALITY PRODUCTS FOR THE TS-2068

Product Descriptions

TASWORD Text Conversion: (available on AERCO DISK - SSDD, or CASSETTE). This program allows the user to create his TEXT with the TASWORD II word-processor, and then import the text into the DTP (Pixel Print PLUS! or Professional). When converting the text to the DTP format, one can select the desired FONT (character style) and also add ICONS as desired. The Pixel Print PLUS! programs have a simple typewriter mode for entering text, but this program allows you to create your text more quickly using TASWORD and its many WP functions! (If you make as many changes to your text as I do, you'll appreciate this program!)

FONT Designer/Library #1 (available on AERCO DISK - SSDD, or CASSETTE). This program allows the user to create or edit 8 point fonts, and also provides a beginning library of 7 FONTS: HEADLINE, IBM, MICR, ADVENTURE, OUTLINE, SXS, CHANCERY.

FONT Library #2 (available on AERCO DISK - SSDD, or CASSETTE). This is a second set of 6 fonts: HELVETICA, TIMES, BOXBOLDOK, RITZ, SINCLAIR, GRANDPRIX.

FONT Library #3 (available on AERCO DISK - SSDD, or CASSETTE). This is a third set of 6 fonts: CURSIVE, OKDEMOHO, STENCIL, THESPIAN, WESTERN, WIDELOAD. Also, there are 3 graphics fonts that are used to create box/borders (27+ styles of borders) and numerous graphics symbols. Also, there is a DTP file that contains a library of 12 graphic banners/mastheads.

16 Point Font Designer (available on AERCO DISK - SSDD, or CASSETTE). This program allows the user to create or edit 3-16 point fonts. A sample 16 point IBM and a 16 point BOLD-IBM font are provided.

ICON Designer/Library #1 (available on AERCO DISK - SSDD, or CASSETTE). This program allows you to BROWSE an ICON library and select/prepare ICONs for use from the library in the DTP. You can view any of the ICONs in the library prior to selecting them. You can even save them as SCREEN$ in 3 different sizes. Library #1 contains 102 high resolution ICONs (little pictures).

ICON Library #2 (available on AERCO DISK - SSDD, or CASSETTE). This library contains 100 more ICONS.

Pixel Sketch and Graphics Editor v2.0 (available on AERCO DISK - SSDD, or CASSETTE). The FIRST TS-2068 graphics program to give you standard 32 column color graphics, 32 column EXTENDED color graphics, and 64 column color graphics! This powerful program noted for the GREAT GRAPHICS EDITOR capabilities that allows you to capture any size screen segment to zoom/shrink/rotate/mirror etc (up to the full screen) received rave reviews in Time Design, TS Horizons, and the Computer Shopper magazine. The program has some pretty good TEXT capabilities too, plus PAINT, COPY, ERASE, SAVE, UNDO, and many many more functions!
